Medical Examination Report

Proposed Life Insured

Last name First name & initial Date of birth (mmm/dd/yyyy)

1. a) Name and address of your personal physician. (If none, so state.) _____
- b) Date and reason last consulted. _____
- c) What treatment was given or medication prescribed? _____

('Treatment' includes the professional services of a therapist, medical practitioner, physician, medical professional or practitioner of alternative medicine and also includes a weight loss or control program.)

Does/Has/Is the proposed life insured:

- 2.1 Presently taking prescription medication? Yes. No.
- 2.2 Presently under treatment? Yes. No.
- 2.3 Had medication, treatment or a diagnostic test prescribed or advised that has not yet been started or completed? Yes. No.
- 2.4 In the past 10 years, had an exercise ECG, echocardiogram or other ultrasound, angiography, CAT or MRI scan, biopsy, endoscope, or other special screening or diagnostic test? Yes. No.
- 2.5 In the past 10 years, been diagnosed as having, or received treatment for:
- a) High blood pressure, stroke, transient ischemic attack (TIA), swelling of the ankles, shortness of breath, chest pain, pressure or discomfort, angina, aneurysm, leg pain, disorder of the arteries, heart attack or murmur, irregular heartbeat, or other disorder of the heart or circulatory system? Yes. No.
- b) High levels of cholesterol or triglycerides in the blood? Yes. No.
- c) Anemia, swollen glands or other disorder of the blood or lymphatic system? .. Yes. No.
- d) Cancer, tumor, polyp, cyst, abscess, unexplained swelling or lumps? Yes. No.
- e) Auto-immune disease or other disorder of the immune system (other than HIV). Yes. No.
- f) Asthma, emphysema, chronic cough, sleep apnea, coughing of blood, or other disorder of the nose, throat or lungs? Yes. No.
- g) Chronic hepatitis, pancreatitis, diarrhea, indigestion, colitis, ileitis, abdominal pain, bleeding, bowel obstruction or chronic disease of the esophagus, stomach, gall bladder, pancreas, liver or bowels? Yes. No.
- h) Chronic kidney disease, kidney stones, an incident of blood in the urine, or a disorder of the bladder, kidney, prostate gland or reproductive organs? Yes. No.
- i) A seizure, convulsion, epilepsy, paralysis, multiple sclerosis, or chronic disorder of the nervous system, brain, eyes or ears? Yes. No.
- j) Depression, anxiety, schizophrenia or other psychiatric disorder? Yes. No.
- k) Arthritis or other chronic disorder of the joints, bones, muscles, skin or connective tissues? Yes. No.
- l) Diabetes or other disease of the pancreas, thyroid, pituitary or other endocrine glands? Yes. No.
- 2.6 Consulted with another physician/medical practitioner, other than identified in question 1, in the past 5 years? Yes. No.
- 2.7 Ever tested positive for HIV (Human Immunodeficiency Virus) as part of a test for obtaining insurance? Yes. No.
- 2.8 Within the past 5 years applied for or received, from any source, waiver of premiums, disability income or a critical illness benefit? Yes. No.
- 2.9 Had/Have a parent and/or sibling with a history of diabetes, heart attack, angina, stroke, cancer, polycystic kidney disease, Huntington's Chorea, Alzheimer's, ALS (Amyotrophic Lateral Sclerosis) or other hereditary disorder? Yes. No.
- (If 'Yes', specify the parent and/or sibling, condition and age at onset in number 2.10.) (For cancer, specify type.)

Details of 'Yes' answers.
 (Identify question number, circle applicable items. Include diagnoses, dates, duration and names and addresses of all attending physicians and medical facilities.)

	Age if living	Age at Death	Details of condition/ Cause(s) of death	Age if Living	Age at Death	Details of condition/ Cause(s) of death
Father	_____	_____	_____	Sibling	_____	_____
Mother	_____	_____	_____	Sibling	_____	_____

I hereby declare that I have read this Medical Examination Report. I was asked every question that applies to me and provided the answers shown to these questions. The statements, answers and representations contained in this Medical Examination Report are full, complete and true. No material circumstance or information concerning the subject matter of the questions asked has been withheld or omitted. All statements made in this Medical Examination Report shall be representations and not warranties.

Dated at _____ in the State of _____ on _____
 City (mmm/dd/yyyy)

In the Presence of _____ Signature of Proposed Life Insured
 Medical Examiner (please print)

Medical Examination Report

This examination should be made in private.

3. a)	Height		Weight	Males only:		
	ft.	in.		lbs.	Chest (full inspiration) in.	Chest (force expiration) in.

b) Did you weigh? Yes. No. Did you measure. Yes. No.
 c) Is appearance unhealthy or older than stated age? Yes. No.

Details of 'Yes' answers.
(Identify them.)

4. Blood pressure(record ALL readings)

Systolic			
Diastolic - 4 th phase.			
- 5 th phase.			

5. Pulse

Rate	At Rest	After Exercise	3 minutes later
Irregularities per min			

6. Heart Is there any: Enlargement Yes. No. Dsypnea Yes. No.
 Murmur(s) Yes. No. Edema Yes. No.
 (Describe below - if more than one, describe separately.)

	Murmur #1	Murmur#2		Mid-clavicular line
Location:	<input type="text"/>	<input type="text"/>	Indicate:	
Constant	<input type="radio"/>	<input type="radio"/>	Apex by X	
Inconstant	<input type="radio"/>	<input type="radio"/>	Murmur area by <input type="radio"/>	
Transmitted	<input type="radio"/>	<input type="radio"/>	Point of greatest Intensity by <input type="radio"/>	
Localized	<input type="radio"/>	<input type="radio"/>		
Systolic	<input type="radio"/>	<input type="radio"/>		
Presystolic	<input type="radio"/>	<input type="radio"/>		
Diastolic	<input type="radio"/>	<input type="radio"/>		
Soft (Gr. 1 - 2)	<input type="radio"/>	<input type="radio"/>		
Mod (Gr. 3 - 4)	<input type="radio"/>	<input type="radio"/>		
Loud (Gr. 5 - 6)	<input type="radio"/>	<input type="radio"/>		
After Exercise:				
Increased	<input type="radio"/>	<input type="radio"/>		
Absent	<input type="radio"/>	<input type="radio"/>		
Unchanged	<input type="radio"/>	<input type="radio"/>		
Decreased	<input type="radio"/>	<input type="radio"/>		

7. Is there on examination any abnormality of the following: (Circle applicable items and give details.)

- a) Eyes, ears, nose, mouth, pharynx. Yes. No.
(If vision or hearing markedly impaired, indicate degree and correction.)
- b) Skin (incl. scars), lymph nodes, varicose veins or peripheral arteries. Yes. No.
- c) Nervous system (include reflexes, gait, paralysis). Yes. No.
- d) Respiratory system. Yes. No.
- e) Abdomen (include scars). Yes. No.
- f) Genitourinary system. Yes. No.
- g) Endocrine system. (include thyroid and breasts). Yes. No.
- h) Musculoskeletal system. (include spine, joints, amputations, deformities). Yes. No.

8. Are there any hernias? Yes. No.

9. Are you aware of any additional history?
 (A confidential report may be sent to the Medical Director.) Yes. No.

10. Urinalysis:

Albumin	Sugar	Blood

If history or presence of albumin, sugar, kidney disease or stone, blood pressure over 150/90, send specimen to:
 ExamOne
 10101 Renner Blvd., Lenexa, KS 66219

Are you sending a specimen? Yes. No.

When completed mail to:
 The Independent Order of Foresters
 P.O. Box 179
 Buffalo NY 14201-0179

Notice and Consent for Blood and Body Fluid Testing

To evaluate your insurability, we have requested that you provide samples of your blood and/or other body fluids for testing and analysis. Depending on your age, your medical history and the amount or the type of insurance applied for, you may be asked to provide a sample of blood and/or other body fluids, such as urine and saliva for testing and analysis. All tests will be performed by a licensed laboratory. By signing and dating this form, you agree that the testing may be done and that underwriting decisions will be based on the test results.

The tests to be performed will include a determination of the presence of antibodies or antigens to the Human Immunodeficiency Virus (HIV), also known as the AIDS virus. The HIV test performed is actually a series of tests designed to determine the presence of these antibodies or antigens. If you have been infected with the HIV virus which causes AIDS, your body may have produced HIV antibodies which try to get rid of the infection.

Instead of providing a blood sample for initial testing purposes, you may be requested to first provide only a sample of your body fluids (e.g. urine or saliva) for testing. This sample of other body fluids will be tested for evidence of HIV antibodies, kidney disorders, diabetes, and foreign substances such as nicotine and cocaine. If this HIV test is abnormal (positive) or other abnormalities are ascertained, you then will be requested to provide a blood sample for full blood series testing including a confirmatory HIV blood test. Other blood tests which may be performed include determinations of blood cholesterol and related lipids (fats), and screening for diabetes, liver and kidney disorders.

Testing considerations:

Many public health organizations have recommended that before taking an HIV related test, a person seek counseling to become informed concerning the implications of such test. You may wish to consider counseling, at your expense, prior to being tested.

Meaning of a positive test result:

The HIV test is extremely reliable. In very rare instances, however, the test result may be abnormal (positive) in persons who are not infected with the virus. Additionally, the test result may occasionally be normal (negative) in persons who are infected with HIV, especially when the infection occurred within the previous 3-6 months.

While abnormal HIV test results do not mean that you have AIDS, they do mean that you are at significantly increased risk of developing AIDS or AIDS-related conditions and you may wish to consider further independent testing. Federal authorities say that persons who are HIV positive should be considered infected with the AIDS virus and capable of infecting others. An abnormal (positive) HIV blood test result or other significant blood or body fluid abnormalities will adversely affect your application for insurance. This means that your application may be declined, that an increased premium may be charged, or that other policy changes may be necessary.

Disclosure of test results:

All test results will be treated confidentially. The results of the test will be reported by the laboratory to us. The test results may be disclosed to employees of Foresters who have the responsibility to make underwriting decisions on behalf of us or to outside legal counsel who need such information to effectively represent us with regard to your application for insurance. The results also may be reported to our affiliates or reinsurers in connection with insurance you have applied for. In addition, if you are refused insurance because your HIV blood test is abnormal (positive), a generic code signifying non-specific blood abnormality will be reported to the Medical Information Bureau, Inc. ("MIB") is described in the notice given to you at the time of application. More specific non-HIV reports may be made to MIB in connection with testing. Test results will not otherwise be disclosed except as required by law or as authorized by you. You have the right to request the names of those specific individuals or organizations.

Notification of test results:

If your HIV test results are normal, no notification will be sent to you. If your HIV tests are abnormal, we will contact you, your legal guardian, if any or the physician authorized by you below. Other abnormal test results which, in our opinion, are potentially significant to your health or insurability will be similarly communicated.

If you wish to preauthorize another person for notification of abnormal test results, please provide the name and address below. We encourage you to authorize a physician or other health care provider for the purpose of discussing test results:

Name and address of physician (Please Print):

Physician's Name

Address

Informed consent:

I have read and I understand this NOTICE AND CONSENT FOR BLOOD AND BODY FLUID TESTING. I voluntarily consent to the withdrawal of blood from me by needle, the testing of that blood and body fluid as described above, and the disclosure of the test results as described above, including disclosure to the physician, if any, indicated above. I have read the information on this form about what a test result means and understand that I should contact a local AIDS service group or my physician or health care provider for further information and counseling if the HIV test result is abnormal. I have been given a copy of the state Hotline phone numbers and addresses (if available). I understand that I have the right to request and receive a copy of this authorization. A photocopy of this form will be valid as the original.

HIV Antibody Test Information Form For Insurance Applicant

AIDS

Acquired Immunodeficiency Syndrome (AIDS) is a life-threatening disorder of the immune system, caused by a virus, HIV. The virus is transmitted by sexual contact with an infected person, from an infected mother to her newborn infant, or by exposure to infected blood (as in needle sharing during IV drug use). Persons at high risk of contracting AIDS include males who have had sexual contact with another man, intravenous drug users, hemophiliacs, and sexual contacts with any of these persons. AIDS does not typically develop until a person has been infected with HIV for several years. A person may remain free of symptoms for years after becoming infected. Infected persons have a 25 percent to 50 percent chance of developing AIDS over the next 10 years.

What are the Symptoms?

Most people infected with the AIDS virus have no symptoms and feel well. Some develop symptoms that may include:

- Fever, including "night sweats"
- Weight loss for no known reason
- Swollen lymph glands in the neck, underarm, or groin area
- Fatigue or tiredness
- Diarrhea
- White spots or unusual blemishes in the mouth.

These symptoms are also symptoms of many other illnesses. They may be symptoms of AIDS only if they are not explained by other illness. Anyone with these symptoms for more than two weeks should see a doctor.

The HIV antibody test:

Before consenting to testing, please read the following important information:

- (a) **"ELISA"** test means an enzyme-linked immunosorbent assay serologic test which has been licensed by the federal Food and Drug Administration to detect antibodies to the human immunodeficiency virus.
(b) **"Positive ELISA test"** means an ELISA test performed in accordance with the manufacturer's specifications which is reactive on an initial testing and on at least one of two additional tests of the same serum or plasma specimen.
(c) **"Western Blot Assay"** means an assay which uses reagents consisting of HIV antigens separated by polyacrylamide gel electrophoresis and then transferred to nitro-cellulose paper to detect antibodies to the human immunodeficiency virus.
(d) **"Reactive Western Blot Assay"** means an Assay which is reactive according to the standards of performance and results specified in the manufacturer's federal Food and Drug Administration approved product circular for the Western Blot Assay reagents and laboratory apparatus.
(e) **"HIV antibody test"** means an ELISA test or a Western Blot Assay, or both.
- Purpose.** This test is being run to determine whether you may have been infected with HIV. If you are infected, you are probably not insurable. This test is not a test for AIDS; AIDS can only be diagnosed by medical evaluation.
- Positive test results.** If you test positive, you should seek medical follow-up with your personal physician. If your test is positive, you may be infected with HIV.
- Accuracy.** An HIV test will be considered positive only after confirmation by a laboratory procedure that the state health officer has determined to be highly accurate. Nonetheless, the HIV antibody test is not 100 percent accurate. Possible errors include:
(a) **False positives:** The test gives a positive result, even though you are not infected. This happens only rarely and is more common in persons who have not engaged in high risk behavior. Retesting should be done to help confirm the validity of a positive test.
(b) **False negatives:** The test gives a negative result, even though you are infected with HIV. This happens most commonly in recently infected persons; it takes at least 4 to 12 weeks for a positive test result to develop after a person is infected.
- Side effects.** A positive test result may cause you significant anxiety. A positive test may result in uninsurability for life, health, or disability insurance policies you may apply for in the future. Although prohibited by law, discrimination in housing, employment, or public accommodations may result if your test results were to become known to others. A negative result may create a false sense of security.
- Disclosure of results.** A positive test result will be disclosed to you. You may choose to have information about your HIV test results communicated to you through your physician.
- Confidentiality.** Like all medical information, HIV test results are confidential. An insurer, insurance agent, or insurance support organization is required to maintain the confidentiality of HIV test results. However, certain disclosures of your test results may occur, including those authorized by consent forms that you may have signed as part of your overall application. Your test results may be provided to the Medical Information Bureau, a national insurance data bank. Your insurance agent will provide you with additional written information about this subject at your request.
- Prevention.** Persons who have a history of high risk behavior should change these behaviors to prevent getting or giving AIDS, regardless of whether they are tested. Specific important changes in behavior include safe sex practices (including condom use for sexual contact with someone other than a long-term monogamous partner) and not sharing needles.
